

CROSSING THE CHASM
Half Day
Outdoor | 15 – 150 Participants

Communication Shared Leadership

Your organization likely invests significantly in developing the skills of your “knowledge workers.” Do you ever wonder why such intelligent, skilled people often find it difficult to work effectively as a team?

In the program Crossing the Chasm teams learn about their own motivational differences and stress responses and then map them to a team profile, using the Strength Deployment Inventory.® The shared language that comes from this simple and powerful tool offers a framework for teams to work more effectively together over the long-term. To reinforce learnings and engage with this language our facilitation team offers an adventure-based Search and Rescue called Crossing the Chasm.

OUTCOMES

- Bust “silos”
- Create common ground
- Strengthen relationships
- Stimulate new leadership

This challenge invites individuals to transfer knowledge and support one another to form task-based partnerships, creatively solve problems together, think strategically before launching into action; uncover motivational diversity as a source of strength to be harnessed by the team, and to express their lateral leadership potential.

* This program has been designed to allow for further customization based on your organizational issues. All our programs include in-depth debriefing sessions that reinforce the link between the learning experience and your organizational issues. This, combined with our facilitators’ expertise, is what makes this learning program powerful.

*“Excellent learning activity for a group that was truly a lot of fun.
Best event I’ve experienced in my 15 years of attending workshops”.*
